

Anti-Annexin A1 Antibody [ANXA1/3728] - BSA and Azide free (A251999)

Specifications:

Name:	Anti-Annexin A1 Antibody [ANXA1/3728] - BSA and Azide free
Description:	Mouse monoclonal [ANXA1/3728] antibody to Annexin A1.
Specificity:	The ANXA1 gene belongs to the annexin family, and contains 4 annexin repeats. A pair of annexin repeats may form one binding site for calcium and a phospholipid. ANXA1 promotes membrane fusion and is involved in exocytosis. The gene for ANXA1 is upregulated in hairy cell leukemia (HCL), and its protein expression is specific for HCL. Detection of ANXA1 provides a simple, highly sensitive and specific assay for diagnosing HCL. Annexin A1 has also been found to be protective against DNA damage induced by heat in breast cancer cells, suggesting it is involved in tumor suppressive and protective activities, and also is associated with treatment resistance.
Applications:	ELISA, Flow Cytometry, IF
Recommended Dilutions:	Flow Cytometry: 1-2 µg/million cells, IF: 1-2 µg/ml
Reactivity:	Human
Immunogen:	Mixture of native proteins from human bone tissues.
Host:	Mouse
Clonality:	Monoclonal
Clone ID:	ANXA1/3728
Isotype:	IgG1
Light Chains:	kappa
Conjugate:	Unconjugated
Purification:	Protein A/G chromatography.
Concentration:	1 mg/ml
Product Form:	Liquid
Formulation:	Supplied in 10mM Phosphate Buffered Saline; without Sodium Azide and carrier free.
Storage:	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
General Notes:	This monoclonal antibody is also available in a different formulation with BSA and Sodium Azide - Anti-Annexin A1 Antibody [ANXA1/3728] (A248819).
Disclaimer:	This product is for research use only. It is not intended for diagnostic or therapeutic use.
