

## Anti-AKT1 Antibody [AKT1/3898R] (A248470)

### Specifications:

Name:	Anti-AKT1 Antibody [AKT1/3898R]
Description:	Recombinant rabbit monoclonal [AKT1/3898R] antibody to AKT1.
Specificity:	This antibody recognizes a protein of 62kDa, which is identified as AKT1. The serine/threonine kinase Akt family contains several members, including Akt1 (also designated PKB or RacPK), Akt2 (also designated PKB tyrosine residues 740 and 751, which bind the subunit of the phosphatidylinositol 3-kinase (PI 3-kinase) complex. Activation of Akt1 by insulin or insulin-growth factor-1(IGF-1) results in phosphorylation of both Thr 308 and Ser 473. Akt proteins become phosphorylated and activated in insulin/IGF-1-stimulated cells by an upstream kinase(s), and the activation of Akt1 and Akt2 is inhibited by the PI kinase inhibitor wortmannin.
