

Anti-PAX8 Antibody [ZR-1] (A250367)

Specifications:

Name: Anti-PAX8 Antibody [ZR-1]

Description: Recombinant rabbit monoclonal [ZR-1] antibody to PAX8.

Specificity: This antibody recognizes a protein of 62kDa, identified as PAX8. It is a member of the

paired box (PAX) family of transcription factors. This nuclear protein is involved in thyroid follicular cell development and expression of thyroid-specific genes. Mutations in this gene have been associated with thyroid dysgenesis, thyroid follicular carcinomas, and atypical thyroid adenomas. PAX-8 is expressed in the thyroid (and associated carcinomas),

non-ciliated mucosal cells of the fallopian tubes, and simple ovarian inclusion cysts, but not normal ovarian surface epithelial cells. PAX-8 is expressed in a high percentage of ovarian

serous, endometrioid, and clear cell carcinomas, but only rarely in primary ovarian mucinous adenocarcinomas. PAX-8 expression is reported in renal tubules as well as renal

cell carcinoma, nephroblastoma, and seminoma. PAX-8 antibody may be used as an

additional immunohistochemical marker for renal epithelial tumors.

Applications: IHC-P

Recommended Dilutions: IHC-P: 1-2 μg/ml

Reactivity: Human

Immunogen: Synthetic peptide corresponding to the C terminus of human PAX8 protein.

Host: Rabbit

Clonality: Monoclonal

Clone ID: ZR-1
Isotype: IgG

Conjugate: Unconjugated

Purification: Protein A/G chromatography.

Concentration: 200 µg/ml

Product Form: Liquid

Formulation: Supplied in 10mM Phosphate Buffered Saline with 0.05% BSA and 0.05% Sodium Azide.

Storage: Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.

General Notes: This monoclonal antibody is also available in a different formulation without BSA and

Sodium Azide - Anti-PAX8 Antibody [ZR-1] - BSA and Azide free (A253547).
