

Anti-CD68 Antibody [KP1] (A250757)

Specifications:

Name:	Anti-CD68 Antibody [KP1]
Description:	Mouse monoclonal [KP1] antibody to CD68.
Specificity:	This antibody recognizes a glycoprotein of 110kDa, which is identified as CD68. It is important for identifying macrophages in tissue sections. It stains macrophages in a wide variety of human tissues, including Kupffer cells and macrophages in the red pulp of the spleen, in lamina propria of the gut, in lung alveoli, and in bone marrow. It reacts with myeloid precursors and peripheral blood granulocytes. It also reacts with plasmacytoid T cells, which are supposed to be of monocyte/macrophage origin. It shows strong granular cytoplasmic staining of chronic and acute myeloid leukemia and also reacts with rare cases of true histiocytic neoplasia. Lymphomas are negative or show few granules.
Applications:	IHC-P
Recommended Dilutions:	IHC-P: 1-2 µg/ml
Reactivity:	Human, Monkey, Mouse, Rat, Rabbit, Feline
Cross Reactivity:	This antibody does not cross react with Porcine, Canine, or Chicken.
Immunogen:	Subcellular fraction of human alveolar macrophages.
Host:	Mouse
Clonality:	Monoclonal
Clone ID:	KP1
Isotype:	IgG1
Light Chains:	kappa
Conjugate:	Unconjugated
Purification:	Protein A/G chromatography.
Concentration:	200 µg/ml
Product Form:	Liquid
Formulation:	Supplied in 10mM Phosphate Buffered Saline with 0.05% BSA and 0.05% Sodium Azide.
Storage:	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
General Notes:	This monoclonal antibody is also available in a different formulation without BSA and Sodium Azide - Anti-CD68 Antibody [KP1] - BSA and Azide free (A253937).
