

Anti-MyoD1 Antibody [SPM427] - BSA and Azide free (A252645)

Specifications:

Name:	Anti-MyoD1 Antibody [SPM427] - BSA and Azide free
Description:	Mouse monoclonal [SPM427] antibody to MyoD1.
Specificity:	This antibody recognizes a phosphor-protein of 45kDa, identified as MyoD1. The epitope of this MAb maps between amino acid 180-189 in the C-terminal of Mouse MyoD1 protein. It does not cross react with myogenin, Myf5, or Myf6. Antibody to MyoD1 labels the nuclei of myoblasts in developing muscle tissues. MyoD1 is not detected in normal adult tissue, but is highly expressed in the tumor cell nuclei of rhabdomyosarcomas. Occasionally nuclear expression of MyoD1 is seen in ectomesenchymoma and a subset of Wilms sarcomas and alveolar soft part sarcomas.
