

Recombinant Human alpha Internexin Protein (A270567)

Specifications:

Name:	Recombinant Human alpha Internexin Protein
Applications:	SDS-PAGE, ELISA, Immunogen Grade
Expression System:	Escherichia coli
Nature:	Recombinant
Protein Species:	Human
Protein Length:	Full length protein.
Sequence:	The vector used in the recombinant expression of this protein adds about 5 kDa to the molecule, including an N-terminal His-tag.
Tag:	His Tag (N-terminus)
Predicted MW:	70 kDa
Product Form:	Liquid
Formulation:	Supplied in 6 M Urea.
Disclaimer:	This product is for research use only. It is not intended for diagnostic or therapeutic use.

Images:

Coomassie brilliant blue stained SDS-PAGE gel of Recombinant Human alpha Internexin Protein (A270567), and various other full length recombinant human proteins. The lanes contain samples of: [1] Protein standards, [2] 1 µg of Recombinant Human Peripherin Protein (A270574), [3] 1 µg of Recombinant Human alpha Internexin Protein (A270567), [4] 1 µg of Recombinant Human Vimentin Protein (A270578), and [4] 1 µg of Recombinant Human 68kDa Neurofilament Protein (A270573) (labelled as NF-L). In each case the proteins run approximately 5 kDa slower than the native protein due to the addition of the His-tag and other vector-derived sequences.
