

Recombinant Human Peripherin Protein (A270574)

Specifications:

| | |
|--------------------|--|
| Name: | Recombinant Human Peripherin Protein |
| Applications: | SDS-PAGE, ELISA |
| Expression System: | Escherichia coli |
| Nature: | Recombinant |
| Protein Species: | Human |
| Protein Length: | Full length protein. |
| Sequence: | The vector used in the recombinant expression of this protein adds about 5 kDa to the molecule, including an N-terminal His-tag. |
| Tag: | His Tag (N-terminus) |
| Product Form: | Liquid |
| Formulation: | Supplied in 6 M Urea. |
| Disclaimer: | This product is for research use only. It is not intended for diagnostic or therapeutic use. |

Images:

Coomassie brilliant blue stained SDS-PAGE gel of Recombinant Human Peripherin Protein (A270574), and various other full length recombinant human proteins. The lanes contain samples of: [1] Protein standards, [2] 1 µg of Recombinant Human Peripherin Protein (A270574), [3] 1 µg of Recombinant Human alpha Internexin Protein (A270567), [4] 1 µg of Recombinant Human Vimentin Protein (A270578), and [5] 1 µg of Recombinant Human 68kDa Neurofilament Protein (A270573) (labelled as NF-L). In each case the proteins run approximately 5 kDa slower than the native protein due to the addition of the His-tag and other vector-derived sequences.
