

Synthetic Nanodisc Human GLP-1R Protein (A318420)

Specifications:

Name:	Synthetic Nanodisc Human GLP-1R Protein
Description:	Synthetic nanodiscs offer a stable and biologically relevant environment that closely mimics cell membranes and enables full-length transmembrane human GLP-1R protein to be purified and analysed in vitro.
Applications:	ELISA, SDS-PAGE
Expression System:	HEK293 cells
Nature:	Synthetic
Protein Species:	Human
Protein Length:	Full length protein.
Molecular Weight:	Full length human GLP-1R protein has a MW of 53.0 kDa.
Conjugate:	Unconjugated
Product Form:	Lyophilized
Concentration:	Reconstitution dependent.
Formulation:	Lyophilized from nanodisc solubilization buffer (20mM Tris-HCl, 150mM NaCl, pH 8.0). Normally 5%-8% Trehalose is added as a protectant before lyophilization.
Storage:	Shipped at 4°C. Lyophilized: Store at -20°C to -80°C. Reconstituted: Aliquot and store at -80°C. Product is stable for one year. Avoid freeze/thaw cycles.
Disclaimer:	This product is for research use only. It is not intended for diagnostic or therapeutic use.

Images:

ELISA plates were pre-coated with Synthetic Nanodisc Human GLP-1R Protein (A318420) (0.2 µg/well). Serial diluted Anti-Flag Tag Antibody solutions were added, washed, and incubated with secondary antibody before ELISA reading. From this data, the EC₅₀ for Anti-Flag Tag Antibody binding with GLP1R-Nanodisc is 3.549 µg/ml.
