Purity verification: $5 \mu \mathrm{~g}$ of Recombinant Phl p 7 (7.0101) Protein with $>95$ \% purity checked by Coomassie Brilliant Blue stained SDS-PAGE.

An ELISA test was designed to prove the bond between the coated target, Recombinant Phl p 7 (7.0101) Protein, and allergen-specific human plasma IgG4 antibodies of Phleum pratense positive donor. A measurable signal was subsequently generated by the addition of Anti-Human IgG4 Antibody (Biotin), Streptavidin-HRP, and substrate solution (TMB). The intensity of the signal is proportional to the amount of coated Recombinant Phl p 7 (7.0101) Protein.
