

Anti-IgA Secretory Component Antibody [ECM1/792] (A248388)

Specifications:

Name:	Anti-IgA Secretory Component Antibody [ECM1/792]
Description:	Mouse monoclonal [ECM1/792] antibody to IgA Secretory Component.
Specificity:	This antibody reacts with a reduction-resistant epitope present in both free and SIgA bound Secretory Component. It does not react with the cell lines lacking secretory component. The antibody is useful for studying the distribution and level of both free and bound secretory component. Secretory component is differentially expressed in epithelium, and the antibody is a popular marker for identifying subpopulations of epithelial cells and epithelial differentiation. The Secretory component antibody is a useful research tool for studying mucosal immunity, inflammation, remodeling, differentiation and tumorigenesis, all processes associated with differential secretory component expression.
Applications:	Flow Cytometry, IF, IHC
Recommended Dilutions:	Flow Cytometry: 0.5-1 µg/million cells, IF: 1-2 µg/ml, IHC: 0.5-1 µg/ml
Reactivity:	Human, Rat
Immunogen:	Recombinant full-length human ECM1 protein.
Host:	Mouse
Clonality:	Monoclonal
Clone ID:	ECM1/792
Isotype:	IgG1
Light Chains:	kappa
Conjugate:	Unconjugated
Purification:	Protein A/G chromatography.
Concentration:	200 µg/ml
Product Form:	Liquid
Formulation:	Supplied in 10mM Phosphate Buffered Saline with 0.05% BSA and 0.05% Sodium Azide.
Storage:	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
General Notes:	This monoclonal antibody is also available in a different formulation without BSA and Sodium Azide - Anti-IgA Secretory Component Antibody [ECM1/792] - BSA and Azide free (A251570).
