

Anti-VEGF Receptor 2 Antibody [DC101] (A250834)

Specifications:

Name:	Anti-VEGF Receptor 2 Antibody [DC101]
Description:	Rat monoclonal [DC101] antibody to VEGF Receptor 2.
Specificity:	This antibody is specific to Mouse VEGFR2/FLK-1/CD309 and does not cross-react with FLK-2. VEGFR2 is a type I transmembrane glycoprotein. It is a member of the CSF-1/PDGF receptor family of type III tyrosine kinase receptors. Endothelial cells, embryonic tissues, and megakaryocytes mainly express VEGFR2. It plays an important role in the regulation of angiogenesis, vasculogenesis, and vascular permeability. The ligands of VEGFR2 include VEGF-A, VEGF-C, VEGF-D, and VEGF splice isoforms. Ligation of VEGFR2 with its ligands results in the receptor dimerization and auto-phosphorylation, stimulating endothelial cell proliferation and migration.
Applications:	WB, Neutralization Studies
Recommended Dilutions:	WB (non-reducing): 2-5 µg/ml
Reactivity:	Mouse
Immunogen:	Recombinant full-length mouse VEGFR2 protein.
Host:	Rat
Clonality:	Monoclonal
Clone ID:	DC101
Isotype:	IgG1
Light Chains:	kappa
Conjugate:	Unconjugated
Purification:	Protein A/G chromatography.
Concentration:	200 µg/ml
Product Form:	Liquid
Formulation:	Supplied in 10mM Phosphate Buffered Saline with 0.05% BSA and 0.05% Sodium Azide.
Storage:	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
General Notes:	This antibody blocks binding of VEGF to VEGF-R2, inhibits VEGF-induced signaling, and blocks tumor growth in mice; order antibody without BSA and Sodium Azide! This monoclonal antibody is also available in a different formulation without BSA and Sodium Azide - Anti-VEGF Receptor 2 Antibody [DC101] - BSA and Azide free (A254014).
